PROFESSIONAL SUMMARY

Self-motivated software testing and Python enthusiast with hands-on experience creating test cases, analyzing software requirements, performing manual testing, documenting defects, and validating application behavior. Strong analytical and problem-solving skills with experience writing detailed QA documentation and learning automation testing concepts. Seeking an opportunity as a Junior QA Tester, QA Automation Engineer, or Entry-Level Software Developer.

EXPERIENCE

Registered Behavior Technician (RBT) Feb 2026 - Present
The Arc Westchester

- Analyzed and meticulously documented behavioral data, maintaining high accuracy for detailed documentation, directly applicable to performing yield analysis and debugging test programs in semiconductor testing.
- Adhered strictly to structured procedures with exceptional attention to detail, a critical skill for executing preventative maintenance and debugging test programs in a high-volume manufacturing environment.
- Collaborated effectively with multidisciplinary teams to support individualized treatment plans, demonstrating strong teamwork and communication skills essential for a Probe Test Engineer Intern role in a lab environment.

Direct Support Professional Aug 2024 - Present
Shrub Oak International School

- Assisted students while maintaining accurate documentation and diligently following established procedures, emphasizing attention to detail and adherence to protocols crucial for semiconductor testing and hands-on lab work.

Material Handler Sep 2023 - Present
Tesla

- Managed inventory using computerized systems, demonstrating experience with structured data management and accuracy, applicable to managing test data, equipment, and performing yield analysis in semiconductor testing.
- Maintained efficient production workflow while ensuring accuracy and quality, showcasing transferable skills for supporting wafer-level electrical testing in a high-volume manufacturing environment.

EDUCATION

High School Diploma Jun 2012
Lakeland High School

Bachelor's degree in Quality Assurance Aug 2001
tripleten Mohegan lake

SKILLS

Languages: Python
Soft Skills: Attention to Detail, Problem Solving, Analytical Thinking, Team Collaboration, Communication, Fast Learner
Other: Manual Testing, Test Case Design, Functional Testing, Requirements Analysis

PROJECTS

QA Test Case Design & Manual Testing Project

- Designed and documented over 30 functional test cases for application address validation, creating positive and negative test scenarios covering valid, invalid, and boundary-value inputs. This experience in test case design and functional testing is directly relevant to developing and debugging test programs for MOSFET and IGBT devices, requiring a systematic approach to electrical testing.

Technologies: Manual Testing, Test Case Design, Functional Testing

Software Requirements Analysis Project

- Analyzed functional software requirements and decomposed them into atomic requirements, identifying user interface components, validation rules, and converting requirements into testable functional specifications. This analytical approach to software requirements is highly beneficial for understanding and debugging complex electrical test specifications and developing robust test programs.

Technologies: SDLC, QA Planning, Requirements Analysis
